BACKGROUND OF THE SCHEME

Cotton is a very delicate crop in terms of pest complex being attacked by different insect pests from germination to harvesting as it is attacked by both sucking pests and bollworms. Among sucking pest’s whitefly, *Bemisia tabaci* Genn is the most detrimental sucking pest. It sucks the cell sap from the underside of leaves and deposits the droplets of honeydew on the leaves, that results in sooty mold development. It also hinders the foliar photosynthesis and reduces yield and quality. Whitefly is also liable for spreading cotton leaf curl virus (CLCV) ailment. Plant protection plays crucial role in the successful production of cotton crop and saves it from the pest attack, however, the rigorous use of pesticides is creating resistance problems and adoption of new chemistry is costly and is not popularizing due to cost and increasing sprays. This phenomenon is also increasing the cost of production, therefore Prime Minister of Pakistan has approved Rs. 6 Billion for subsidy on Whitefly products @ Rs. 300/pack for white fly is proposed. The subsidy would be Rs. 300 per application at an average of 4 applications per acre and will cover 5 million acres in Punjab and Sindh

Province, which is around 80% of the cotton area. Amount of subsidy will remain Rs. 300/pack without any prejudice of packing whether one acre or above but shall not be less than one acre in any case.

Keeping in view, Punjab DGA Ext& AR has finalized a plan with the concurrence of Punjab Agriculture Department and under the directions of Ministry of National Food Security and Research, Islamabad to launch a direct subsidy program for the eligible farmers through Pre-Paid Vouchers in cotton region of the Punjab and can be extended to other regions as well after the approval of Federal Government.
